SPYCLOPS BASIC DVR SETUP

All steps are given in order as if from home screen. If after completing a step and returning to the home screen you see a message that says *"Configuration changed! To save the latest configuration?"* Click *"Yes"* to save your settings.

Step 1: First Time Log In

Right click on mouse for Setup (screen will display "*Username*" and "*Password*", do not enter any text in this window).

➔ OK.

➔ Setup (you will now see the main Setup screen).

Step 2: Username and Password (Password is required for remote access in browsers or apps)

Setup

➔ System Tools -- User management

➔ Set password, (Old password leave blank).

➔ Enter new password.

➔ Repeat.

➔ Ok.

➔ Ok.

"Configuration changed! To save the latest configuration?" Click *"Yes"* to save your settings.

If you want the Username to be different than "*admin*" you will need to add user.

To add new *"User"*

Setup

➔ System Tools-- User management

➔ Add User.

➔ Type in User Name.

➔ Select User Access Level.

➔ OK.

➔ Select new "User".

➔ New Password.

➔ Repeat.

➔ Ok.

➔ Ok.

Step 3: Set Date and Time

Setup

➔ System setup – General setup

➔ Select the correct Date and time.

➔ Click the 'Apply' button.

➔ Click 'Yes' to 'Are you sure to continue'.

➔ Ok.

➔ Ok.

Step 4: Basic Network Setup

To generate the Esee ID the DVR must be connected to the network through an Ethernet cable.

Setup

➔ System setup – Network setup.

➔ Check the DHCP box to dynamically assign an IP through the router and click the Esee box to populate the Esee ID.

➔ Ok.

➔ It may take up to 10 minutes for the Esee number to populate.

"Configuration changed! To save the latest configuration?" Click "*Yes"* to save your settings.

Step 5: Access the DVR from a browser connected to the same network

Setup

➔ System setup – Network setup -- make note of your DVR IP address and Esee number.

➔ In a web browser in the same network, enter the IP address you just took note of from the DVR.

➔ Accept the pop up and install Active X controls.

➔ Enter the username and password for the DVR in the log in screen and select the log in button.

Step 6: Setup Recording

Setup

➔ ⚙ System setup – 📹 Record setup

➔ Pick the channel and day of the week you want to record.

➔ Choose Time, Motion or Sensor for the recording mode.

➔ Click Copy to if you want to copy the setting to another channel or to all other channels.

➔ Ok.

"Configuration changed! To save the latest configuration?" Click *"Yes"* to save your settings.

Step 7: Video Playback

➔ Setup – 🎬 Video Playback

➔ Pick the channel you want to play back.

➔ Choose Time, Motion or Sensor for the recording mode.

➔ Enter the record time and hit Search.

➔ Select the recording block in which you want to view and click playback.
