

User Manual

CS-88M, CS-44M

8x8 and 4x4 4K HDMI Matrix

The CS-88M and CS-44M supports up to 18Gbps 4K60, 4:4:4, HDR, Dolby Vision

The CS-88M and CS-44M are true 18Gbps 4K60 (4:4:4) 8x8 HDMI matrix switches. Supporting HDMI 2.0(a/b), HDCP 2.2, up to 4K video resolution, and up to 18 Gbps bandwidth. The CS-88M supports 8 HDMI sources (Blu-ray, UHD Blu-ray, satellite receiver, game consoles, PCs, etc. ...) and 8 separate displays, while the CS-44M supports 4 HDMI sources and 4 HDMI displays. Allowing you to view any of the connected sources on any of the connected displays at any one time.

Features:

- HDMI 2.0 (a/b)
- 4K60 4:4:4 Support
- Full HDR Support (HDR 10 & 12 Bit)
- Dolby Vision, HDR10+ and HLG Support
- HDCP 2.2 (up-to)
- Web GUI Interface
- Advanced EDID Management
- IR, RS-232 and LAN Control Options
- Audio De-Embedding via SPIDF & 3.5mm jack
- Install in seconds
- Powerful EDID management
- Front Panel Control
- IR Remote
- IR & RS-232 Control
- LAN Control
- Driver Support for Crestron, C4, Etc.

In The Box:

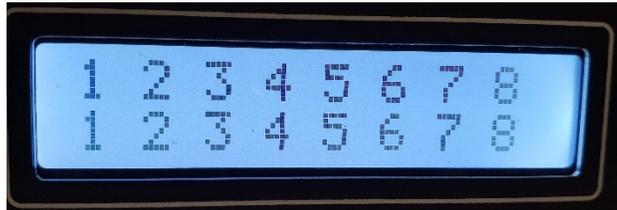

- CS-88M or CS-44M HDMI Matrix
- IR Remote Control
- 12V/4A Locking Power Supply

Front Panel Control

Switching

The CS-88M and CS-44M can be switched from the front panel by selecting the OUTPUT button first and then selecting the INPUT button:

1. Press the OUTPUT button (1 through 8) on the bottom row that corresponds with the OUTPUT (Display, or Sink Device) you would like to send to a source.
2. Once pressed, the switch will illuminate the OUTPUT button that you have selected, along with the INPUT row, indicating that it is ready for you to select the INPUT.
3. Select the desired INPUT.

EDID

The CS-88M and CS-44M has the ability to control the EDID that the source devices sees as a display

1. Press and hold the INPUT button of the source you want to set EDID for 3 seconds
2. Use the selected INPUT button as UP and the corresponding OUTPUT button as DOWN to select the desired EDID setting
3. To set the selected EDID setting press and hold for 3 seconds the original INPUT button

Toggle DHCP

The CS-88M and CS-44M comes from the factory with DHCP turned off. To enable DHCP from the front panel:

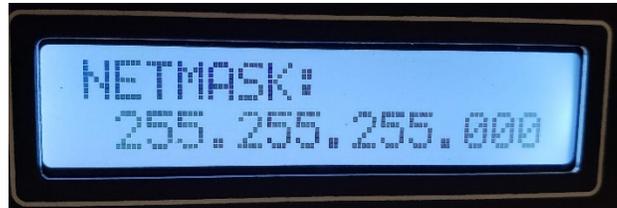

1. Press and hold INPUT 1 and INPUT 4 together for 3 seconds

View Network Settings

1. Press and hold INPUT 3 and INPUT4 together for 3 seconds

The CS-88M and CS-44M will cycle through the following information: Device IP, Host IP, Subnet Mask, and MAC Address.

View Firmware Version

To view the current firmware on the CS-88M or the CS-44M:

1. Press and hold INPUT 2 and INPUT 4 together for 3 seconds

Locking Front Panel Buttons

You have the ability to lock the front panel buttons so any accidental button presses can be ignored.

1. Press and hold INPUT 2 and INPUT 3 together for 3 seconds

Web Interface

In order to access the Web Interface use a web browser (e.g. Internet Explorer, Chrome, Edge, Safari, etc.) and go to the IP address of the Matrix.

Switching

The screenshot shows the 'Live Switch' web interface. At the top, there is a navigation menu with tabs: 'Live Switch' (selected), 'Link Info', 'IR Setting', 'Video Setting', 'Audio Setting', 'Audio Matrix', 'EDID Manage', and 'System Setting'. Below the menu is the MetraHomeTheater.com logo and the text 'Manufacturer of Premium Home Theater Products'. The main content area is titled 'Live Switch' and contains a grid of 8 rows and 8 columns. The rows are labeled OUT1 through OUT8, and the columns are labeled IN1 through IN8. Each cell in the grid is a grey button. At the bottom of the interface, it says 'CS-88MHDBTS V1.00'.

Use the following page to switch between inputs and outputs from the web interface live.

IR Setting

The screenshot shows the 'IR Setting' web interface. At the top, there is a navigation menu with tabs: 'Live Switch', 'Link Info', 'IR Setting' (selected), 'Video Setting', 'Audio Setting', 'Audio Matrix', 'EDID Manage', and 'System Setting'. Below the menu is the MetraHomeTheater.com logo and the text 'Manufacturer of Premium Home Theater Products'. The main content area is titled 'IR Switch' and contains a grid of 8 rows and 8 columns. The rows are labeled OUT1 through OUT8, and the columns are labeled IN1 through IN8. Each cell in the grid is a grey button. At the bottom of the interface, it says 'CS-88MHDBTS V1.00'.

The IR switching allows you to route the IR signals on the IR outputs manually if you need to have a fixed route.

Note: By default the IR OUT is automatically routed with the active source.

Video Setting

MetraHomeTheater.com
Manufacturer of Premium Home Theater Products

HDMI Video Scaler Mode			HDMI Output Signal Generator			HDBT Video Scaler Mode			HDBT Output Signal Generator		
OUT1	HD-4K	BYPASS	OUT1	ON	OFF	OUT1	4K-HD	MLC MODE	OUT1	ON	OFF
OUT2	HD-4K	BYPASS	OUT2	ON	OFF	OUT2	4K-HD	MLC MODE	OUT2	ON	OFF

CS-88MHDBTS
V1.00

On this screen you can modify the video signal that is being output by the matrix.

- either upscale, downscale or bypass the scaling feature
- Enable to disable the Output Signal Generator
 - NOTE: The HDMI and HDBT outputs can be tested independent from each other.

The CS-88MHDBTS and CS-44MHDBTS have the ability to extract audio out to either SPDIF or a Stereo 3.5. It also has the ability to give matrix control over where the audio is output.

Audio Settings

MetraHomeTheater.com
Manufacturer of Premium Home Theater Products

	Ex-Audio Output Delay(MS)								Audio Status	
	90	180	270	360	450	540	630	Bp	OUT1	OUT2
OUT1									ON	OFF
OUT2									ON	OFF
OUT3									ON	OFF
OUT4									ON	OFF
OUT5									ON	OFF
OUT6									ON	OFF
OUT7									ON	OFF
OUT8									ON	OFF

NOTE: Bp - Bypass.

CS-88MHDBTS
V1.00

Here you can turn on or off the extracted audio for the SPDIF digital Coax or 3.5 Stereo ports.

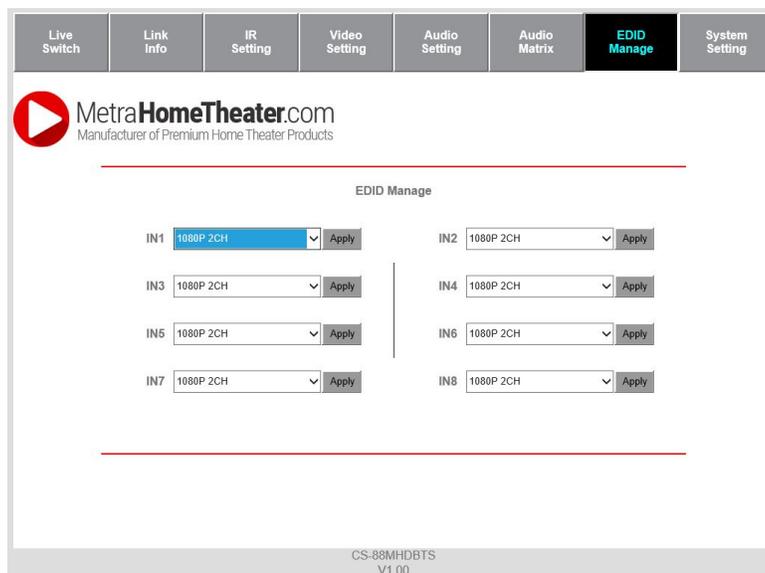

Audio Matrix and EX-Audio Matrix Mode

Here you can set the route of the audio in a matrix fashion for the extracted audio connections and bind the audio to follow either the INPUT, OUTPUT, or set it to be Matrixed.

- Audio Delay – This allows you to change the audio delay to combat lip-sync issues on the extracted audio. Each audio output can be delayed independently of the others.
- Bind to Input – The extracted audio binds to its corresponding input. E.g. Audio out 3 will always output audio from INPUT 3.
- Bind to Output – The extracted audio binds to its corresponding output. E.g. Audio Out 3 will always output audio from whichever input is selected for OUTPUT 3.
- Matrix – The extracted audio can be set manually to specific Audio Outs. E.g. Audio Out 3 will always play audio from INPUT 4 regardless of what INPUT is selected for OUTPUT 3.

EDID Manage

Here you can set or control the EDID for the individual inputs.

CS-88MHD8TS
V1.00

IP Settings – Here you can set the network configurations. E.g. set the static IP address, change the TCP port, or find the MAC address.

Port Alias Setting – Here you can give the individual inputs or outputs an Alias, or a name. E.g. if INPUT 1 is a cable box, you can name it “Cable”, or if OUTPUT 3 is the Master Bedroom TV, you can name it “Master Bed”

EDID Management

The CS-88M and CS-44M matrices have 29 pre-configured EDID settings. They also have 3 user defined EDID memories.

NOTE: In order to maximize compatibility, by default the matrix is set to a 1080p EDID. When using 4K sources, you will want to define a 4K EDID on that input (or read from the display).

To Change the EDID setting with the face buttons:

1. Press and hold the INPUT you want to change for 3 seconds
2. Now "press" the desired INPUT/OUTPUT (Example: Setting EDID for INPUT3, use IN 3 & OUT 3) to toggle through the available EDID options
3. Once you are on the EDID you want to select, press and hold the INPUT button again for 3 seconds. The LCD Screen will say "Please Wait", then "OK" once the EDID is set.

To change the EDID setting with the Web Interface, login to the Matrix through a web browser using the IP address and then select EDID. From there you can select the desired/required EDID for each input individually.

These are the pre-configured EDID settings that are available to toggle through:

0: 1080P_2CH(PCM)	17: 1080P_8CH_HDR
1: 1080P_6CH	18: 1080P_3D_2CH(PCM)_HDR
2: 1080P_8CH	19: 1080P_3D_6CH_HDR
3: 1080P_3D_2CH(PCM)	20: 1080P_3D_8CH_HDR
4: 1080P_3D_6CH	21: 4K30Hz_3D_2CH(PCM)_HDR
5: 1080P_3D_8CH	22: 4K30Hz_3D_6CH_HDR
6: 4K30Hz_3D_2CH(PCM)	23: 4K30Hz_3D_8CH_HDR
7: 4K30HZ_3D_6CH	24: 4K60Hz(Y420)_3D_2CH(PCM)_HDR
8: 4K30HZ_3D_8CH	25: 4K60Hz(Y420)_3D_6CH_HDR
9: 4K60Hz(Y420)_3D_2CH(PCM)	26: 4K60Hz(Y420)_3D_8CH_HDR
10: 4K60Hz(Y420)_3D_6CH	27: 4K60Hz_3D_2CH(PCM)_HDR
11: 4K60Hz(Y420)_3D_8CH	28: 4K60Hz_3D_6CH_HDR
12: 4K60HZ_3D_2CH	29: 4K60Hz_3D_8CH_HDR
13: 4K60HZ_3D_6CH	30: USER_EDID_1
14: 4K60HZ_3D_8CH	31: USER_EDID_2
15: 1080P_2CH(PCM)_HDR	32: USER_EDID_3
16: 1080P_6CH_HDR	

The first 30 EDID settings cannot be changed. The three USER EDID settings are programmed using RS-232 or the web interface. However, you can read an EDID from any output and it will automatically store in USER EDID 1. Remember, each INPUT has an independent EDID setting and you may need to program each one. To read and set an EDID to a specified input the steps are the same as switching the EDID normally, except when you see the following figure, press and hold the original INPUT button again for 3 seconds. This will read, store, and set the EDID for that INPUT based on the OUTPUT selected.

IR Remote Control

The HDMI matrix can also be controlled by using the supplied IR remote. The left arrow button switches to the previous button in the sequence, and the right arrow switches to the next input in sequence.

RS-232 TCP/IP Control Commands

These commands apply to both the CS-88M and the CS-44M. Where applicable, commands that show 1-8 for inputs or outputs if used with the CS-44M do not exceed 4 for the inputs and outputs.

System HELP	
System Address = 00	F/W Version : 1.00
Azz	All Commands start by Prefix System Address zz, if [01~99]
System Control Setup Commands	
H	Help
STA	Show Global System Status

Safety Instructions

To protect the safety of any person using or handling these devices and to ensure the reliable operation of these products, please follow these instructions:

1. Use provided power supplies
 - a. If alternate power supply is necessary, check Voltage, Polarity and Amperage to ensure sufficient and correct power is supplied to the device.
2. Operate these products within specified temperature and humidity ranges
3. Ensure adequate ventilation
4. Repair should be handled only by qualified professionals due to sensitive devices that may be damaged if mistreated.
5. Only operate in a dry environment. These devices are not meant for outdoor or marine environments

Troubleshooting

- Verify Power - The LCD screen on the front of the matrix should be lit up when power is applied. Check that both power supplies are connected to the matrix and powered
- Verify Connections - Check that all cables are properly connected
- Issues with one INPUT/OUTPUT - Swap ports/cables/etc to help narrow down if the issue stays with the input/output/etc
 - Follows the device, then it may be an EDID issue. Default out of the box is a 1080p 2ch. Try another canned EDID or use the COPY FROM OUTx command to copy the connected displays EDID - Pg.12, 17, 23
- Issues with 4k but 1080p or less is working
 - Verify all connected devices are capable of the signal you are sending

Warranty

If your device does not work properly because of a defect in material or manufacturing, Metra Home Theater will either repair or replace with a new or refurbished unit for a period of 10 Years. You must mail-in your product during the warranty period. This Limited Warranty is available only to the original purchaser and only covers products purchased as new. A receipt or other proof of original purchase with the purchase date is required for warranty service.
