PRODUCT OVERVIEW

The Install Bay Active Fiber Cables create a whole new level of value and performance with the 24Gbps specifications. This series does things a little differently than your typical fiber cable. They use ultra-energy efficient Rx/Tx chipsets that do not need any added external power, allowing for a cleaner and simpler installation. Robust head shell and jacket designs also help make for a better install by protecting the cable and its built-in electronics.

- Full 24Gbps support (4K/60, 4:4:4, Deep Color & HDR)
- Audio Return Channel (ARC/eARC)*
- Ethernet over HDMI®
- CL3 or CMP plenum available

* Although the conductors for ARC and eARC are present, distances beyond 50' are strongly dependent on the source and display's capability to support at a longer distance and is commonly incapable.
